

## CAN'T MESS IT UP

*“We talk glibly about freewill;  
but the more we learn of spiritual law,  
the less positive we are about the reality  
of human freewill,”* says an Ascended Master.

Master reasoning goes something like this:  
Because there is only One Presence,  
Everything is necessarily connected.  
Everything must exist in relation to everything else.

Therefore, nothing is free to act in isolation.  
All actions and thoughts cause reactions  
In the fabric of the Cosmos.  
Impossible for actions or thoughts to be  
Outside of the Cosmic Plan.

We believe in  
Omniscience, Omnipresence, and Omnipotence,  
Don't we? Or is that concept merely lip service?

With that in mind, ask yourself:

“Where is The One Presence **NOT** ?”

“Of myself, what do **I THINK?**”

“What principles do **I BELIEVE** ?”

“Am I a **LIVING** witness who's proving my thoughts and beliefs?”

The Master continues:

*“All men like to believe that they possess free will  
and can choose their own path.”*

**LIKE TO BELIEVE...** is the key.

Ready for a tough spiritual adjustment?

By releasing our white-knuckle grip  
On believing we have **FREE WILL**,  
And by accepting that the One Will flows through everything  
—presenting us with many choices—

We can finally understand:

That there are no “wrong” decisions, only difficult lessons;  
That there is no need for guilt, only for compassion;  
That only love and kindness heal all wounds.

With that understanding,

Our arrogance diminishes and humility arises.

We become overwhelmingly aware that we participate in Creation.

We begin to integrate our experiences all the way to the bone,  
Because we participate in the One Omni, Omni, Omni Presence  
Directing the dynamic Life Force and Will-to-Good  
—All That Is—which is constantly  
**BECOMING** all perceptible and imperceptible forms,  
**INCLUDING PHYSICAL US AND ALL OUR ETHERIC BODIES.**

If spiritual philosophy is accurate,  
There are always many alternate solutions to any problem.  
However, reality reports that our human condition  
Limits our ability to recognize more than one or three options.

That’s not really too “free,”  
Considering that the choices we make  
Determine our destiny.

And it’s a darn good thing we **don’t** have free will.  
The present world would look like “Peace At Last!”  
Compared to the chaos it might be if we were totally in control  
And free-wheeling creation independently.

So glad to know **Guidance Incognito**  
Directs us Exactly where we need to help create.

Even if we don’t like it.
