

THE NOTION OF MOTION

The energy of Evolution
Is the energy of transformation.

ALL is constantly in the process of Becoming,
Transforming, Changing, Transmuting, and Evolving,
Which makes----

MOTION the common denominator of the Cosmos.

The notion of motion requires the presence of Space and Time
Through which mass can move with velocity.

Though we suspect our Universe has dimensions beyond comprehension,
As far as we know, only the 3rd dimension has Space and Time.

So, only in the 3rd dimension is Motion possible.

Here, human Will, Intention, and Concentration produces
Ethereic Thought-Forms.

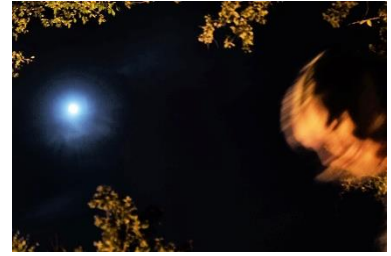

Here, human Thought-Forms and Ideas, reinforced by Desire,
Have the Space and Time to materialize,
Changing everything.

Here, in the 3rd dimension, Change, Transformation, Evolution,
And continually *Becoming*, is not only possible, but a mandate..

What a blessing to be human and be able to re-create ourselves.

What a responsibility to think, desire, intend, and invent
That which evolves everything toward a Higher Good.

Falls under the heading of
“Be careful what you really, really, wish for.”
