

## UNIVERSITY OF LIFE

Going to University is like living **LIFE**—  
*After* you are awakened and consciously evolving.

Every event is a **LIFE** teaching  
That *can* end with Love and Compassion.

Every **LIFE** circumstance is unique and requires acceptance, then Mastery.

You have to make **LIFE** decisions about who and how you will be.

You have to take **LIFE'S** tests, requiring deep soul searching.

**LIFE-CLASS** is hard and changes your mind, aligns your thinking with Truth.

You have to really work at **LIFE**, gleaning deeper understandings.

You keep hoping you're doing **LIFE** right—because you don't want to do it again.

You wonder why you signed up for that course in **Surrender to LIFE**.

**LIFE** sports are brutal contests of **Will, Choices, and Behaviors**.

In **LIFE**, there are many degrees to achieve, little by slowly.  
Graduation takes **LIFETIMES**.  
The consolation is that your **LIFE** is the only game in town.

You see, Baby Love, there's nowhere else to go  
Until you complete **LIFE'S** requirements for ascension.
