

## WHOEVER WAS IT SAID

### Whoever was it said:

*You've Got One Life to Live, so make it good?*

*The Earth is flat?*

*The Sun revolves around the Earth?*

*Space is empty?*

*What you see is what you get?*

*When you die you go to heaven or hell?*

*Step on a crack, break your mother's back?*

Whoever was it that decided there's good luck and bad luck?  
And how did they make *that* short-sighted call?

And whatever, on God's green earth, makes people think  
That just because they *believe it*, it's absolutely true?

Seems like most everything we *think* we know,  
Turns out to be not so.

*Probably wise to walk in that double-edged cusp  
Where spirit and science overlap.*
